

Benefits, HR & Payroll Data Exchange

Auto-sync demographic data and payroll deductions

Working with your payroll or HRIS vendor, PPI Benefit Solutions eliminates duplicate entry of employee demographics and payroll deductions between the two systems.

The data exchange process is secure and automatic. PPI receives a demographic file from the payroll system via SFTP, which automatically feeds PPI's AutoEnroll system and allows employees or administrators to make benefit elections. A payroll deduction file is then sent via SFTP back to the payroll system. Two-way SSO can be established for ease of moving back and forth between portals.

About PPI

With a 50+ years benefits administration track record, PPI combines access to a broad array of nationally recognized insurance carriers with technology powered by Businessolver and extraordinary service to create a tranformational benefits experience. www.ppibenefits.com.
